### Hear What Our Clients Have to Say

"Having attended numerous trainings over the past 20 years of service, I can honestly say that your training provided the most realistic scenarios for our members. I personally know that each member walked away with many new skills. The instructors of Long Island Rescue were extremely knowledgeable and knew how to motivate and inspire. They taught by example and were not hesitant to get down and dirty with the men, a trait that is all too often not seen with instructors. We are eager to train with Long Island Rescue again in the near future and once again extend our gratitude to you and your instructors for the tremendous impact you've had on our department." - Rich Cafarelli, 1st Assistant Chief, Holtsville Fire Dept. (NY)  
 Course: FAST/RIT Training (March 2009)
